

Embossing

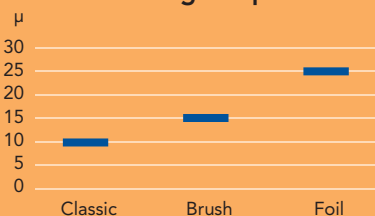

Definition

- The embossing is achieved by mechanical treatment during the finishing.
- It valorises the gloss and the brightness of the paper and inks.
- It can also optimise the labeling.

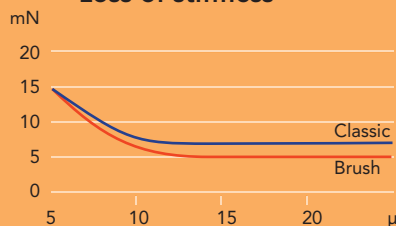

Grades

- **Classic embossing :**
For the entire set.
- **Brush embossing :**
For the entire set.
- **Foil embossing :**
Alternative to foil.

Embossing deepness

Loss of stiffness
