

Peel off labels

Definition

- Applied Coating on the backside of the label for an easy removal of the label
- Ideal to promote games & promotions.
- The Peel-off system can be combined with other technologies, such as thermomic, scratch on, perforation.

Technical information & application

- Can be applied on returnable and non-returnable bottles. (All casein glues can be used).
- Maximal labeling & storage temperature : $\leq 40^{\circ}\text{C}$. If the temperature is higher than 40°C , the freshly labelled Peel-off label will have its backside coating altered leading to the complete adhesion of the label (the label will tear off).
